<b>Office Action Summary</b>	<b>Application No.</b> 10/748,306	<b>Applicant(s)</b> LI ET AL.	
	<b>Examiner</b> JAY P. PATEL	<b>Art Unit</b> 2466	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1, 4-8, 11-13, 16-20, 37 and 40-41, drawn to a request to send involving a fixed number of training symbols and sending the training symbols in a clear to send signal, classified in class 370, subclass 445.
- II. Claims 42-47, drawn to achieving high throughput in a wireless system involving sending training symbols in an acknowledgment, classified in class 375, subclass 358.

Newly submitted claims 42-47 directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: Inventions I and II are directed to related processes. The related inventions are distinct if: (1) the inventions as claimed are either not capable of use together or can have a materially different design, mode of operation, function, or effect; (2) the inventions do not overlap in scope, i.e., are mutually exclusive; and (3) the inventions as claimed are not obvious variants. See MPEP § 806.05(j). In the instant case, the inventions as claimed are directed to sending training symbols in two distinct manners; in group 1 the training symbols are sent using a CTS and in group II the symbols are sent using an acknowledgment. Furthermore, the inventions as claimed do not encompass

Art Unit: 2466

overlapping subject matter and there is nothing of record to show them to be obvious variants.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claim 42-47 withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1, 3-8, 11-13, 16-20, 37, 40-41 rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The specification fails to provide support for attaching training symbols corresponding to both the number of the transmit antennas and the number of receiving antennas. For example, figures 10-12, show the transmission of training symbols but fail to provide support for the training symbols corresponding to the transmit and receive chains. This matter was added to the claims in an amendment filed 2/23/2009.
